**FOR IMMEDIATE RELEASE:**

### **Dr. Christopher Seidler Joins Haverhill Office of Commonwealth Hematology-Oncology**

Haverhill, MA — Christopher W. Seidler, M.D. recently joined the Haverhill office of Commonwealth Hematology-Oncology (CHO) as a medical oncologist. He will work with Paul J. Spieler, M.D., who opened CHO's Haverhill office in 2004 and is now expanding services for local patients. CHO is the largest community-based private cancer care group in New England.

An award-winning physician with over 20 years of experience, Dr. Seidler's hospital appointments include Merrimack Valley Hospital in Haverhill, Anna Jaques Hospital in Newburyport, Caritas Holy Family Hospital, in Methuen, and Lawrence General Hospital in Lawrence. Prior to joining CHO, Dr. Seidler was the Director of Hematology/Oncology at the Fallon Clinic in Worcester, the Chairman of the Cancer Committee and Acting Director of the Division of Hematology/Oncology at Saint Vincent Hospital in Worcester. He received his Medical Degree from Rutgers Medical School in Camden, NJ, and his B.A. at Hampshire College in Amherst, MA. He

completed his Fellowship at Dartmouth Medical School in Hanover, NH, and his residency and internship at Brown University Program in Internal Medicine, Rhode Island Hospital, Providence, RI.

Dr. Seidler is a member of the American Medical Association, the American College of Physicians, the American Society of Clinical Oncology, and the American Society of Hematology.

*Commonwealth Hematology-Oncology (CHO), with offices and clinical sites throughout Massachusetts, is the largest private practice cancer care network in New England. Known for its leadership in community-based cancer care, CHO physicians have been caring for patients for over three decades. CHO was the first group practice in the state to develop treatment guidelines for specific cancers, the first to develop a computerized software program for chemotherapy ordering, the first to create a patient advocacy program, and the only area practice to be selected by the National Cancer Institute to offer community-based clinical trials. CHO also provides genetic testing to community residents at high risk for cancer. For more information, visit [www.chomed.com](http://www.chomed.com).*
